California Institute of Technology
Mail Code 127-72
Pasadena, CA 91125, USA
FAX 1-818-4050454

Important: please adhere to instructions to authors, to be found on the last page of each volume.

After acceptance of the paper for publication, all further correspondence should be sent to the publishers (Ms. S.A. Hallink, Editorial Department, Chemistry & Chemical Engineering Department, P.O. Box 330, 1000 AH Amsterdam, The Netherlands; telephone 31-20-5862664, FAX 31-20-5862459, telex 10704 espom nl; electronic mail X400: C=NL; A=400NET; P=SURF; O=ELSEVIER; S=HALLINK, I=S or RFC822: S.HALLINK@ELSEVIER.NL).

Chemical Physics Letters is published weekly. For 1992, 12 volumes, volumes 186–197 (72 issues) have been announced. The subscription price for these volumes is Dfl. 5712.00 (US\$ 3441.00). Postage and handling amount to Dfl. 372.00 (US\$ 224.00). Therefore the total price for 1992 is Dfl. 6084.00 (US\$ 3665.00). The Dutch guild price is definitive, dollar prices are for guidance only. Claims for issues not received should be made within three months of publication. If not, they cannot be honoured free of charge.

Subscriptions should be sent to the publisher: ELSEVIER SCIENCE PUBLISHERS B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, The Netherlands, or to any subscription agent or bookseller. For personal rates and conditions please contact the Publisher.

US mailing notice – Chemical Physics Letters (ISSN 0009-2614) is published weekly by Elsevier Science Publishers, Molenwerf 1, P.O. Box 211, 1000 AE Amsterdam. Annual subscription price in the USA US\$ 3665.00, including air speed delivery. Application to mail at second class postage paid at Jamaica, NY 11431.

USA POSTMASTERS: Send address changes to Chemical Physics Letters, Publications Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003. Airfreight and mailing in the USA by Publication Expediting.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Special regulations for readers in the USA. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copyright of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US\$ 2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purpose, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

North-Holland Personal Library

Stochastic Processes in Physics and Chemistry

Revised and Enlarged Edition

by N.G. van Kampen

1992 xiv + 464 pages Price: US \$ 78.00 / Dfl. 125.00 ISBN 0-444-89349-0

This new edition of Van Kampen's standard work has been completely revised and updated. Three major changes have been made.

The Langevin equation receives more attention in a separate chapter in which non-Gaussian and colored noise are introduced. Another additional chapter contains old and new material on first-passage times and related subjects which lay the foundation for the chapter on unstable systems. Finally a completely new chapter has been written on the quantum mechanical foundations of noise. The references have also been expanded and updated.

Contents: Preface to the first edition. Preface to the second edition. Abbreviated references.

- I. Stochastic variables.
- II. Random events.
- III. Stochastic processes.
- IV. Markov processes.
- V. The master equation.
- VI. One-step processes.
- VII. Chemical reactions.
- VIII. The Fokker-Planck equation.
- IX. The Langevin approach.
- X. The expansion of the master equation.
- XI. The diffusion type.
- XII. First-passage problems.
- XIII. Unstable systems.

- XIV. Fluctuations in continuous systems.
- XV. The statistics of jump events.
- XVI. Stochastic differential equations.
- XVII. Stochastic behavior of quantum systems.

Comments on the first edition:

"Van Kampen has produced a superbly written, physically motivated introduction to the theory of stochastic processes. ... an excellent introduction to the use (and avoidance of abuse) of master equations. It should be in every physics and chemistry library."
Physics Today

"This is a book which ... could be expected to become an essential part of the library of every physical scientist concerned with problems involving fluctuations and stochastic processes, as well as those who just enjoy a beautifully written book. It provides an extensive graduate-level introduction which is clear, cautious, interesting and readable."
Physics Bulletin

"The author presents the intuitive background of the basic notions, gives many examples always related to applications and makes comparisons between the

mathematicians approach and that of the physicists, and all this is done in a fascinating and lucid style...an excellent survey and reference text ... warmly recommended to applied mathematicians, to statistical physicists and to theoretical physico-chemists."
Zentralblatt für Mathematik

Contact your regular supplier or:

ELSEVIER SCIENCE PUBLISHERS

P.O. Box 211
1000 AE Amsterdam
The Netherlands

Customers in the USA and Canada:

ELSEVIER SCIENCE PUBLISHING CO. INC.

P.O. Box 882
Madison Square Station
New York, NY 10159, USA

No postage will be added to prepaid book orders. US \$ book prices are valid only in the USA and Canada. In all other countries the Dutch guilder (Dfl.) price is definitive. Customers in the European Community should add the appropriate VAT rate applicable in their country to the price(s). In New York State please add applicable sales tax. All prices are subject to change without prior notice.

NORTH-HOLLAND

(AN IMPRINT OF ELSEVIER SCIENCE PUBLISHERS)

NEW JOURNALS FROM ELSEVIER

MICROPOROUS MATERIALS

Audience

Chemists and chemical engineers working both in academia and the

chemical petroleum, agricultural and biochemical industries; physical and (in)organic chemists, environmental and materials chemists.

Editor:

J. Weitkamp, Universität Stuttgart, Stuttgart, Germany

Consulting Editor:

P.A. Jacobs, Katholieke Universiteit Leuven, Leuven, Belgium

Regional Editors:

K. Segawa, Sophia University, Tokyo, Japan

S.L. Suib, University of Connecticut, Storrs, CT, USA

AIMS AND SCOPE

Microporous Materials is an international journal devoted to all aspects of zeolites and other microporous solids, including the practical applications of such materi-

als. The scope covers the following:

- preparation and characterization
- chemical and physical modification
- separation and purification by diffusion, sorption and molecular sieving
- applications in environmental protection, such as waste disposal or removal of pollutants
- process modelling and scale-up studies
- host/guest interactions
- applications in electronics, electrochemistry, optical devices, sensors, membranes, hydrogen storage or heat pumps.

Each issue includes a **Patent Section** and a **News Section**.

SOLID STATE NUCLEAR MAGNETIC RESONANCE

An International Journal

Audience

Academic and industrial researchers

engaged in the development of new NMR techniques and their application to structural analysis.

Editor-in-Chief:

J. Klinowski, University of Cambridge, Cambridge, UK

Regional Editors:

H. Eckert, University of California, Santa Barbara, CA, USA

D. Müller, Bruker Analytische Messtechnik GmbH, Rheinstetten, Germany

AIMS AND SCOPE

The journal **Solid State Nuclear Magnetic Resonance** publishes original manuscripts of high scientific quality dealing with all experimental and theoretical aspects of solid state NMR. This includes

advances in instrumentation, development of new experimental techniques and methodology, new theoretical insights, new data processing and simulation methods, and original applications of established or novel methods to scientific problems of product and procedure developments. Typical areas for such applications include:

- Solid State Chemistry / Materials Science
- Surface Chemistry / Catalysis
- Polymer Science and Characterization
- Geology / Mineralogy
- Biochemistry / Biology / Medicine
- Physics

North-Holland Delta Series

The Delta Series includes a selection of carefully edited volumes providing timely reviews and state-of-the-art reports in all fields of physics. Both established and emerging fields are covered, thus presenting a broad range of topics at the forefront of today's physics.

Magnetic Properties of Fine Particles

J.L. Dormann and D. Fiorani (editors)

1992 xiv + 432 pages
US \$187.50 / Dfl. 300.00
ISBN 0-444-89552-3

Dynamics and Mechanisms of Photoinduced Electron Transfer and Related Phenomena

N. Mataga, T. Okada and H. Masuhara (editors)

1992 xviii + 566 pages
US \$162.50 / Dfl. 260.00
ISBN 0-444-89191-9

Photochemical Processes in Organized Molecular Systems

K. Honda (editor)

1991 xiv + 538 pages
US \$125.00 / Dfl. 200.00
ISBN 0-444-88878-0

Neutron, X-Ray and Light Scattering

P. Lindner and T. Zemb (editors)

1991 x + 376 pages
US \$109.00 / Dfl. 175.00
ISBN 0-444-88946-9

Nonlinear Phenomena in Fluids, Solids and Other Complex Systems

P. Cordero and B. Nachtergaele (editors)

1991 xii + 482 pages
US \$140.50 / Dfl. 225.00
ISBN 0-444-88791-1

Thermal Field Theories

H. Ezawa, T. Arimitsu and Y. Hasimoto (editors)

1991 xvi + 606 pages
US \$140.50 / Dfl. 225.00
ISBN 0-444-88903-5

Mechanics, Analysis and Geometry: 200 Years after Lagrange

M. Francaviglia (editor)

1991 xii + 560 pages
US \$150.00 / Dfl. 240.00
ISBN 0-444-88958-2

Strongly Coupled Plasma Physics

S. Ichimaru (editor)

1990 xxiv + 708 pages
US \$164.00 / Dfl. 263.00
ISBN 0-444-88363-0

Between Science and Technology

A. Sarlemijn and P.A. Kroes (editors)

1990 viii + 214 pages
US \$62.50 / Dfl. 100.00
ISBN 0-444-88659-1

Scattering in Volumes and Surfaces

M. Nieto-Vesperinas and J. Dainty (editors)

1990 viii + 324 pages
US \$115.00 / Dfl. 184.00
ISBN 0-444-88529-3

Nonlinear Phenomena in Complex Systems

A.N. Proto (editor)

1989 viii + 256 pages
US \$141.25 / Dfl. 226.00
ISBN 0-444-88035-6

Turbulence and Nonlinear Dynamics in MHD Flows

M. Meneguzzi, A. Pouquet and P.L. Sulem (editors)

1989 x + 280 pages
US \$127.50 / Dfl. 204.00
ISBN 0-444-87396-1

High Gain, High Power Free Electron Laser: Physics and Application to TeV Particle Acceleration

R. Bonifacio, L. De Salvo Souza and C. Pellegrini (editors)

1989 xvi + 310 pages
US \$127.50 / Dfl. 204.00
ISBN 0-444-87395-3

Geometrical and Algebraic Aspects of Nonlinear Field Theory

S. De Filippo, M. Marinaro, G. Marmo and G. Vilasi (editors)

1989 x + 248 pages
US \$104.00 / Dfl. 166.00
ISBN 0-444-87359-7

COMPUTATIONAL CHEMISTRY

Structure, Interactions and Reactivity

edited by **S. Fraga**, *University of Alberta, Edmonton, Canada*

Studies in Physical and Theoretical Chemistry Volume 77A and B

This work presents a comprehensive overview of the present state of research in computational chemistry. It contains 52 chapters, which deal with the development of new formalisms, numerical calculations, analysis of results and interpretation of physical/chemical phenomena. The work on these topics being carried out at laboratories throughout the world is described in these chapters.

Computational Chemistry may be used as a textbook in graduate courses, e.g. on solids, where the course material can be complemented by the chapters on superconductors, metals ionic solids, imperfect crystals, insulators and polymers. As a reference work, a specific chapter will acquaint the reader with the goals of research in a particular field, the formulation best adapted (at present) for that task, and the quality of the results which may be obtained. Further reading of the selected references given in the chapter will lead to a detailed knowledge of the field. The

complementary character of the chapters is best exemplified by the mention of subjects such as configuration interaction treatments (in general for atoms, for simple molecules), biological receptors and drug design (intermolecular potentials, quantum similarity, shape analysis solvent effects, modelling), spectroscopy (Raman and infrared, NMR, photoelectron), chemical reactions (classical trajectories, reactivity, heterogeneous catalysis), etc.

Contents: Part A

Atomic and Molecular Structure

General Theory

Beyond Hartree-Fock

Practical Details

Specialized Applications

Atomic and Molecular Interactions

Dynamics

Potentials
Molecular Associations

Contents: Part B **Interactions**

Radiation-Matter

General Formulations
Specialized Applications

Condensed Matter

Statistical Mechanics
Liquids

Solids

General Formulations
Specialized Applications

Surfaces.

Reactivity.

1992 lii + 1406 pages
Part A and Part B
Price: US \$ 568.50 / Dfl. 995.00
